

HEAT SHRINK INSULATING BUSHING BOOTS

Heat Shrink insulating boots are used to create shrouded cable terminations for in-line or elbow connections to switchgears and transformers with outer cone bushings rated up to 33 kV.

Features & Benefits

- Simple and easy installation
- Requires standard gas torch installation
- High-performance insulation material
- Excellent track and erosion resistance
- Removable for access to bushing connection
- Available for in-line and right-angled configurations
- Unlimited shelf life

Heat Shrink Insulating Bushing Boots 11kV (set of three)

Item Code	Description	Size Range (mm ²)
KMTE-TE (RPN: 257141-011)	RSRB - 4044 (HS Insulating Bushing Boots 11kV 16-95mm ²)	16 - 95
KMTE-TE (RPN: 718495-011)	RSRB - 4046 (HS Insulating Bushing Boots 11kV120-300mm ²)	120 - 300

Heat Shrink Insulating Bushing Boots Right Angle 33kV (set of three)

Item Code	Description	Size Range (mm ²)
KMTE-TE (RPN: 358133-011)	RSRB – 6046 (HS Insulating Bushing Boots 33kV 120-300mm ²)	120 -300
