

FLEXIBLE COPPER BRAID

Suitable for used in transmitting current across conducting mediums that are subjected to different motions caused by thermal expansion, vibration or operational movement.

Material : Annealed Copper

: Tin Plated Finishing

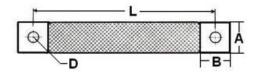

Model	Braid Dimension	Rating	Temperature Rise Test on 1m Length
CBFB-400	48mm x 5.0 mm	400A	Max: 51°C
CBFB-300	38mm x 4.0 mm	300A	Max: 50°C
CBFB-200	25mm x 3.0 mm	200A	Max: 50°C
CBFB-150	20mm x 3.0 mm	150A	Max: 45°C
CBFB-100	20mm x 2.0 mm	100A	Max: 32°C
CBFB-60	16mm x 1.6 mm	60A	Max: 17°C
CBFB-30	10.5mm x 1.4 mm	30A	Max: 10°C

Notes:

- 1. Suitable for connection from 30A up to 1,000A.
- 2. Available in coil of 50m length.
- 3. Can be supplied "Cut-to-length" according to requirements, with or without connectors.

L - Hole-to-hole Length

D – Stud-hole Diameter

A & B - Connector Dimensions
