

MECHANICAL ALUMINIUM LUG (CENTRED PALM)

A bolted alternative which does not require crimping tool or high operator skill.

Bolts are torque-controlled to ensure clean and right shear-offs for a good contact.

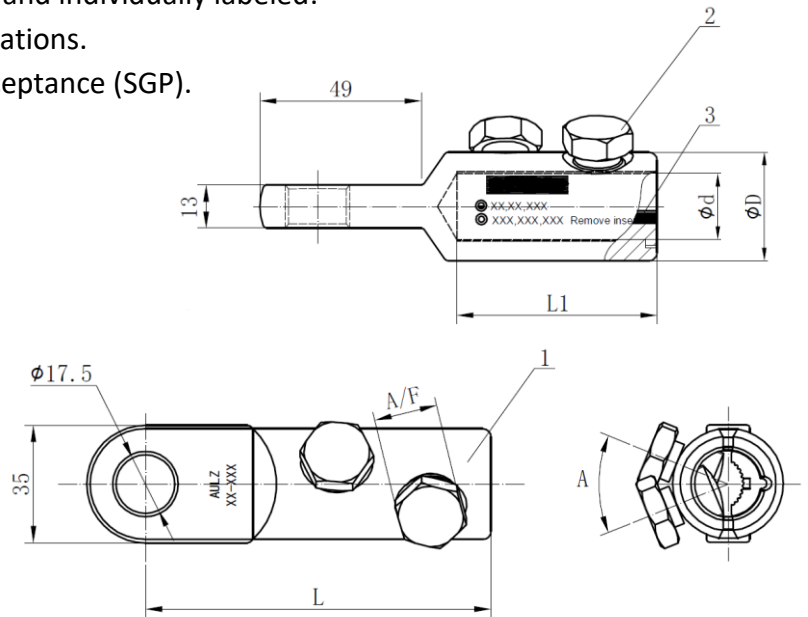

Solid palm eliminates ingress of moisture.

Made from high strength Aluminium alloy. Surface is electro tin-plated.

All lugs are pre-filled with jointing compound and individually labeled.

Suitable for a wide range of LV and MV applications.

Approved with TNB Certificate of Product Acceptance (SGP).

Conductor Size Range (mm ²)	Item Code	Stud Hole (mm)	No. of Bolts	Wrench Size	Dimensions (mm)					
					D	d	L1	L	A	AF
